

Intellicon Solutions Learning Batch Registration Solution

Intellicon Solutions offers an automated batch registration and completion solution for your learning system – to allow ease of bulk loading registration data

Learning System Batch Registration Solution Overview

Intellicon Solutions now makes it simple and fast to register or record completions for large numbers of learners in your Learning Management System (LMS), via a file upload process. The batch registration solution utility, developed by Intellicon, is a customizable application that offers an easy-to-use Web front end to auto load a template-based data file of learner information. Intellicon can further customize this application to meet your specific requirements, such as creating a badge reader interface to auto-populate the data file or adding any type and number of unique data fields to the template.

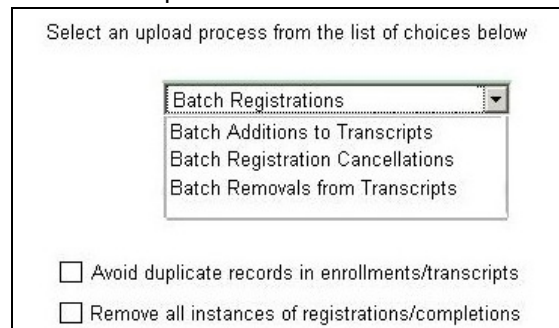

Access to the batch registration solution is configurable for any role via the learning system Web interface. In addition to enrolling and completing courses, the solution also enables canceling courses and removing them from the user’s transcript. Duplicate enrollments and completions are also properly handled. Help is available from the interface, which also features the ability to download the standard template for reuse. All operations are fully logged, and the final results from all operations can be viewed as follows:

Batch Number	Type	Created On	Learner	Status	Processed Status/Error
00001020	Registration	02/05/2009	mmeyers	Successful	Registration Created
00001020	Registration	02/05/2009	ijohnson	Unsuccessful	Username does not exist
00001020	Registration	02/05/2009	bdavis	Unsuccessful	Learner Status <=> Active

With this batch registration solution you will benefit from simplified operation, faster processing and lower costs in registering large numbers of learners or adding or removing large numbers of transcript records.

An example of the batch registration user interface:

Select an upload process from the list of choices below

Avoid duplicate records in enrollments/transcripts

Remove all instances of registrations/completions

Intellicon Solutions Overview

Intellicon Solutions has been in the business of providing expert consulting services for over 15 years. Intellicon's primary goal is to build long-term relationships with its clients. This enables Intellicon Solutions to learn about the corporate culture, goals and growth plans, as well as the specific skill sets required for each task. Intellicon will be a partner dedicated to your business, and its professionals will make a critical contribution to the success of your project.

In addition to application management services, Intellicon provides learning consulting services for short- or long-term projects. Intellicon's consultants are highly skilled, results-oriented professionals who are dedicated to complete customer satisfaction. Intellicon's learning offerings span the complete range of business and technical services.

Intellicon also specializes in technologies related to learning systems. This includes Web portals and personalization servers, content management systems and interfaces such as single sign-on and LDAP.

Intellicon Solutions serves clients ranging from Global 1000 to mid-market companies. Through its services, these organizations have realized operational savings, improved customer service, increased revenue and differentiation in the marketplace. Intellicon's clients include prestigious companies such as APL, Bank of America, ExxonMobil, Xilinx, AOL Time-Warner, Cypress Semiconductor, Charles Schwab and Kaiser Permanente.
